

## Planning For Nursery- September 2020

### Settling In Curriculum

During the first half term, planning will be differentiated with the new children in mind. Planned adult and child initiated learning opportunities will be the focus in all areas of the EYFS. Whilst some children will choose to experiment with planned activities, our main focus within the EYFS is to support Personal, social and emotional development. This area of learning will be the focus at every activity and at every level of interaction between child and adult. We want to ensure that the children work at a pace which enables them to settle and achieve in a relaxed, safe, secure and stimulating environment. The children will be taught how to access different areas of the Nursery and will learn how to play, put things away and look after their environment.
